Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org/>).

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

DECT™, **PLUGTESTS™**, **UMTS™** and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP™** and **LTE™** are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M™** logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM®** and the GSM logo are trademarks registered and owned by the GSM Association.

Foreword

This Technical Specification (TS) has been produced by ETSI Technical Committee TETRA and Critical Communications Evolution (TCCE).

The present document is part 5 of a multi-part deliverable covering Rules for the management of the TETRA standard encryption algorithms, as identified below:

- Part 1: "TEA1";
- Part 2: "TEA2";
- Part 3: "TEA3";
- Part 4: "TEA4";
- Part 5: "TEA5";**
- Part 6: "TEA6";
- Part 7: "TEA7".

Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

1 Scope

The purpose of the present document is to specify the rules for the management of the TETRA standard encryption algorithm TEA5. This algorithm is intended for air interface encryption in TETRA products.

The specification for TEA5 consists of the following three parts:

- Part 1: Algorithm specification;
- Part 2: Design conformance test data;
- Part 3: Algorithm input/output test data.

The procedures described in the present document apply to licensing organizations to manufacture, possess, install, repair, hold, use and destroy equipment and components containing the TEA5 algorithm and to delivering parts 1, 2 and 3 of the TEA5 specifications.

Parts 1 and 2 of the specification are confidential.

Part 3 of the specification is not confidential and can be obtained directly from the TEA5 Custodian (see clause 7.2). There are no restrictions on the distribution of this part of the specification.

The management structure is defined in clause 4. This structure is defined in terms of the principals involved in the management of TEA5 (ETSI, ETSI Technical Committee TETRA and Critical Communications Evolution, TEA5 Custodian and approved recipients) together with the relationships and interactions between them.

Clause 5 is concerned with the rules for the use of TEA5. This clause is supplemented by annex H, which provides an exemplary list of the states and territories in which a User may become an approved recipient.

Clause 6 describes the types of licence that may be requested.

The procedures for delivering TEA5 specifications to approved recipients are defined in clause 7. This clause is supplemented by annex A, which specifies the items that are to be delivered.

Clause 8 is concerned with the criteria for approving an organization for receipt of TEA5 deliverables and with the responsibilities of an approved recipient. This clause is supplemented by annexes B to G which contain the Confidentiality and Restricted Usage Undertakings to be signed by the TEA5 Custodian and approved recipients of TEA5 specifications and/or equipment and components containing TEA5.

Clause 9 is concerned with the appointment and responsibilities of the TEA5 Custodian.

2 References

2.1 Normative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

Referenced documents which are not found to be publicly available in the expected location might be found at <https://docbox.etsi.org/Reference>.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document.

Not applicable.

2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

NOTE 1: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

- [i.1] ETSI EN 300 392-7: "Terrestrial Trunked Radio (TETRA); Voice plus Data (V+D); Part 7: Security".
- [i.2] ETSI EN 300 396-6: "Terrestrial Trunked Radio (TETRA); Direct Mode Operation (DMO); Part 6: Security".

NOTE 2: [i.1] and [i.2] may also be published as ETSI Technical Specifications, specifically TS 100 392-7 and TS 100 396-6 respectively. In each case, the latest version of the specification, either TS or EN, applies.

3 Definition of terms, symbols and abbreviations

3.1 Terms

For the purposes of the present document, the following terms apply:

computer software carrier: physical storage medium capable of containing and transporting computer software or data, such as a ROM chip, CD ROM or disk, or flash memory or computer hard drive

end user: organization that has been approved to use TEA5 by either the primary or secondary user or by the TEA5 custodian

installer: organization that installs hardware or software components containing the TETRA Standard Algorithm TEA5 into TETRA subscriber equipment, fixed network equipment or TETRA system simulators

manufacturer: bona fide designer or manufacturer of TETRA equipment or components which include TEA5

permitted state or territory: state or territory within which TEA5 is allowed to be used, where the list of states and territories is maintained by the TEA5 custodian

primary user: governmental organization for a TETRA network that is primarily used by public safety organizations in their own state or territory

repairer: organization that repairs TETRA subscriber equipment, fixed network equipment, or system simulators that contain TEA5

secondary user: military organization in a state or territory with approval to operate a TETRA network given by the governmental organization that is responsible for public safety

supplier: supplier, distributor or reseller of TETRA subscriber or fixed network equipment in which TEA5 is included or TETRA system simulators in which TEA5 is included, or a third party operator or service provider supplying TETRA services with TEA5 to a primary and/or secondary user

TEA5 custodian: interface between ETSI and recipients of TEA5 licences and specifications

user: primary or secondary user

3.2 Symbols

Void.

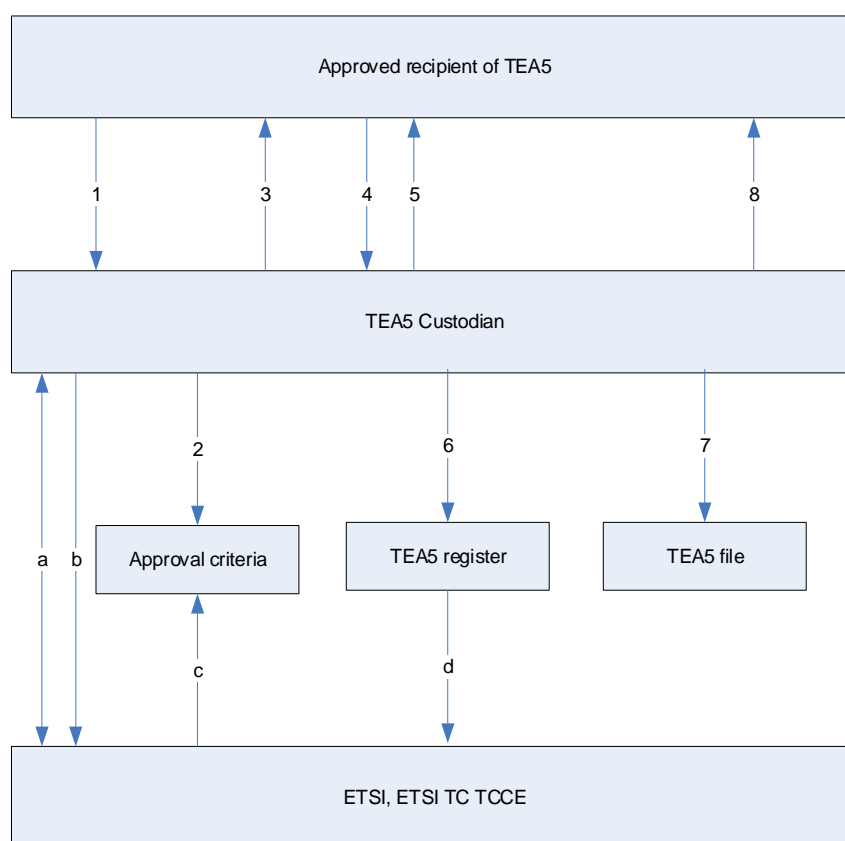

3.3 Abbreviations

For the purposes of the present document, the following abbreviations apply:

CRUU	Confidentiality and Restricted Usage Undertaking
DMO	Direct Mode Operation
MS	Mobile Station
SFPG	Security and Fraud Prevention Group
SwMI	Switching and Management Infrastructure
TEA5	TETRA standard Encryption Algorithm number 5
TETRA	TErrestrial Trunked RAdio

4 TEA5 management structure

The management structure is depicted in figure 1.

Key:

- a = Agreement between TEA5 Custodian and ETSI
- b = Status reports and recommendations
- c = Setting of approval criteria
- d = Requested details of the TEA5 register
- 1 = Request for TEA5 specification and/or licence
- 2 = Check of request against approval criteria
- 3 and 4 = Exchange of Confidentiality and Restricted Usage Undertaking
- 5 = Dispatch of TEA5 specification (only if appropriate)
- 6 = Update the TEA5 register
- 7 = Document filing
- 8 = Technical advice (only if requested)

Figure 1: TEA5 management structure

Figure 1 shows the three principals involved in the management of TEA5 and the relationships and interactions between them:

- ETSI is the owner of the TEA5. ETSI Technical Committee TETRA and Critical Communications Evolution sets the approval criteria for receipt of the algorithm (see clause 8).
- The TEA5 Custodian is the interface between ETSI and the recipients of TEA5 licences and specifications.
- The TEA5 Custodian is as identified in clause 9.2 of the present document. The TEA5 Custodian's duties are detailed in clause 9. They include distributing signed TEA5 Confidentiality and Restricted Usage Undertakings (CRUUs) and, if appropriate, specifications to approved recipients, as detailed in clauses 7 and 8, providing limited technical advice to approved recipients and providing algorithm status reports to ETSI Technical Committee TETRA and Critical Communications Evolution.

NOTE: A CRUU signed by both the TEA5 Custodian and applicant constitutes a licence to hold or use TETRA subscriber and fixed network equipment and components containing TEA5.

The form of CRUU exchanged is summarized in figure 2.

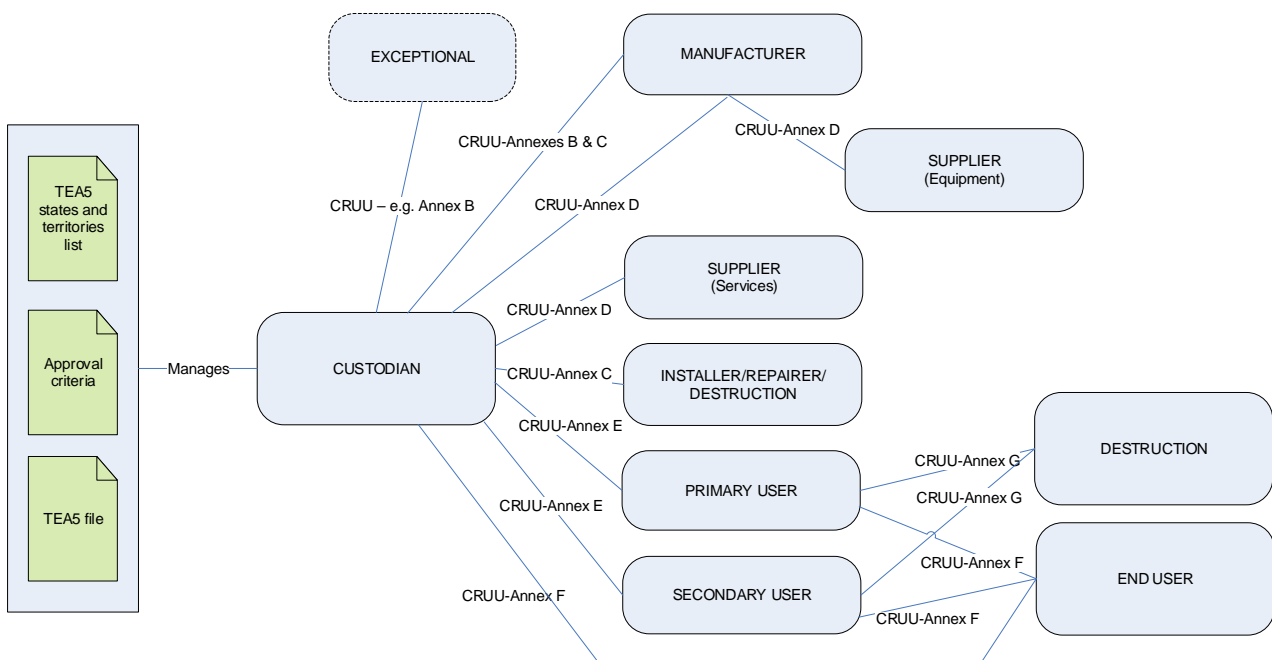

Figure 2: Summary of CRUU types maintained between TEA5 principals

5 Use of TEA5

5.1 Primary and Secondary Users of TEA5

A TEA5 Primary and Secondary User Licence is given to a governmental organization for a TETRA network that is primarily used by public safety organizations (see note 1) in their own state or territory. A TETRA network may consist of fixed base stations and SwMI, all located in the home state or territory, and/or one or more base stations and SwMIs that may also be used outside the home state or territory if both base stations and SwMIs are controlled from the home state or territory. A governmental organization that obtains a TEA5 User Licence under these conditions is referred to as a primary user of TEA5. The Confidentiality and Restricted Usage Undertaking (CRUU) in annex E applies to primary and secondary users (see note 2). The TEA5 licence is required for the use of TEA5 in any element of the TETRA network including TETRA Subscriber equipment (TETRA Mobile Station (MS)) where air interface encryption as defined in ETSI EN 300 392-7 [i.1] or ETSI EN 300 396-6 [i.2] is applied.

NOTE 1: Public safety organizations are e.g. Police, Fire brigade, Customs and Excise, Ambulance and Emergency Medical Service, Coastguard.

NOTE 2: There may be more than one primary user in any allowed state and the number of primary users is a national option.

It is to be decided by the primary user of TEA5, who has received a TEA5 User Licence from the TEA5 Custodian, which user organizations can use the above-mentioned network. This may be done on the basis of a sublicensing procedure that may also be needed for the procurement of mobile terminals or movable equipment by a user or user organization. An organization that obtains a TEA5 End User Licence under these conditions is referred to as an end user of TEA5. A sub licence issued by the primary user of TEA5 is valid in the area of jurisdiction of that primary user, however it may also be extended to permit end users to operate in another permitted state or territory with the agreement of the primary user of that other state or territory. The CRUU in annex F applies to end users.

A primary user can approve the use of TEA5 in a TETRA network owned by a military organization that is operational in the same state or territory as the primary user. In the case where there is no primary user in that state or territory the military organization has to demonstrate written approval to operate a TETRA network given by the governmental organization that is responsible for public safety in its home state or territory. Such military organizations are referred to as secondary users. The CRUU in annex E applies to secondary users. Again in these cases a TETRA network may consist of fixed base stations and SwMI, all located in the home state or territory, and/or one or more base stations and SwMIs that may also be used outside the home state or territory if both base stations and SwMIs are controlled from the home state or territory. A military organization licensed as above may use its TEA5 network and terminal equipment in connection with its deployment in any location outside of the TEA5 approved states and territories subject to the permission of its primary user or governmental organization responsible for public safety, and the relevant export authority. When so deployed the use of the network and associated equipment is limited to members of that military organization and others associated with that deployment. The network and associated equipment shall remain under the management of the owning military organization who will remain responsible and liable under the terms and conditions contained within the CRUU. Agreed standard operating procedures, including a strong and robust audit and accounting process, shall be in place. All network and associated equipment shall be recovered upon completion of that deployment.

NOTE 3: Primary and secondary users are expected to comply with the relevant national security policies concerning the management and sub-licensing of TEA5.

5.2 TEA5 States and Territories

Organizations can be a primary or secondary user of TEA5 when it is based and (normally) operates in a state or territory that is at least:

- a) a Schengen state (see note 1);
- b) a European Union state (see note 2);
- c) a candidate European Union state (see note 3);
- d) a dependent area of one of the Schengen or (candidate) European Union states (but not overseas (see note 4));

- e) a state (but not overseas) that has a bilateral agreement with the European Union; or
- f) a state that only has borders with TEA5 states or territories as in point a) through e).

NOTE 1: Including autonomous regions of that state that are also part of Schengen.

NOTE 2: Including autonomous regions of that state that are also part of the European Union.

NOTE 3: Including autonomous regions of that state that are also candidate part of the European Union.

NOTE 4: Overseas Countries and Territories as in Part Four of the Consolidated version of the Treaty establishing the European Community (2002) plus French overseas territories (French Guyana, Guadeloupe, Martinique, Réunion).

An exemplary list of TEA5 states and territories is provided in annex H. The TEA5 Custodian maintains the definitive list of TEA5 states and territories.

5.3 Manufacture, supply, installation, repair and destruction of TEA5 equipment and services

A manufacturer licence may be issued to an organization that designs and/or manufactures completed equipment containing TEA5, or components of equipment (such as sub-assemblies, software modules or semiconductors) containing TEA5 or test equipment containing TEA5.

NOTE: An entity which manufactures TETRA equipment that does not contain TEA5 is not classified as a 'manufacturer' for the purposes of the present document, and provided that the entity does not subsequently install or integrate TEA5 from another source, such an entity may not need a manufacturer licence.

The licensee may provide such equipment, components or test equipment directly to an end user, or may provide these to another manufacturer, or to a supplier, installer or repairer of equipment containing TEA5, and may provide equipment or components for destruction. The recipient of a manufacturer licence may also supply, install, repair and destroy equipment containing TEA5 without the need for an additional licence. In order to provide equipment, components or test equipment containing TEA5 to another party, the manufacturer shall be provided with a copy of the TEA5 CRUU issued to that other party where that CRUU has been countersigned by the Custodian or primary or secondary user.

A supplier licence may be issued to an organization that provides equipment, components or test equipment containing TEA5 to an end user, but where the supplying organization does not manufacture or assemble such equipment, components or test equipment itself. Examples of suppliers of equipment can be distributors or resellers of equipment who act as intermediaries between the manufacturer and the end user. There can be multiple suppliers who have contractual responsibility in a chain of equipment supply between manufacturer and end user, and the supplier licence is applicable to all suppliers in such a chain of supply. A candidate for a supplier licence needs to be nominated by the manufacturer of the equipment, components or test equipment that contains TEA5. In a supplier relationship with the manufacturer and end user, at least one of the supplier and the manufacturer shall be supplied with a copy of the TEA5 CRUU issued to the end user where that CRUU has been countersigned by the Custodian or primary or secondary user, and the party that has been supplied with this copy of the end user's licence shall confirm to the other party or parties in the chain of supply that the copy of the end user licence has been provided. This usage of the supplier licence is illustrated as 'supplier (equipment)' in figure 2.

A supplier licence may be issued to an organization that operates a TETRA network containing TEA5 in order to provide TETRA services to end users. A supplier licence may also be issued to a service provider that provides network services to the end users on behalf of the network operator. In a service provider relationship with the end user, at least one of the service provider and network operator shall be supplied with a copy of the TEA5 CRUU issued to the end user to whom service is provided where that CRUU has been countersigned by the Custodian or primary or secondary user, and the party that has been supplied with this copy of the end user's licence shall confirm to the other party or parties in the chain of service provision that the copy of the end user licence has been provided. This usage of the supplier licence is illustrated as 'supplier (services)' in figure 2.

An installer/repairer/destruction licence may be issued to an organization that installs completed equipment containing TEA5, and which may possess test equipment containing TEA5. The installer/repairer/destruction licence may be given to an organization that repairs equipment containing TEA5 and which may handle components and/or software carriers containing TEA5, and which may possess test equipment containing TEA5. The installer/repairer/destruction licence may be given to an organization that destroys equipment containing TEA5 on behalf of a manufacturer, supplier or end user. The holder of the installer/repairer/destruction licence may only install equipment for or supply repaired equipment to an end user whose end user licence has been verified either by the party carrying out the installation or repair, or by a manufacturer on whose behalf the installation or repair has been carried out and where the manufacturer confirms to the installer or repairer that the copy of the end user's licence has been provided.

A destruction licence may be issued to an organization that destroys equipment or components or software carriers or test equipment containing TEA5, and who does not need to be able to install or repair equipment containing TEA5.

6 Licence types

6.1 Manufacturer Licence

An organization wishing to manufacture TETRA equipment and/or components containing TEA5 obtains its licence and copies of the TEA5 specifications by the procedure defined in clause 7.1.

6.2 Installer/Repairer/Destruction Licence

An organization that installs hardware or software components containing TEA5 into equipment requires a manufacturer licence (see clause 6.1) or an installer/repairer/destruction licence.

An organization that repairs equipment or hardware or software components containing TEA5 requires a manufacturer licence or an installer/repairer/destruction licence.

An organization that destroys equipment or components containing TEA5 requires a manufacturer licence, an installer/repairer/destruction licence or a destruction licence (see clause 6.7).

An organization that destroys computer software carriers containing TEA5 requires a manufacturer licence or an installer/repairer/destruction licence.

A TETRA manufacturer that possesses a manufacturer licence may be permitted, subject to national legislation, to nominate a third party to install TEA5 into equipment, to repair equipment and components containing TEA5 and to destroy equipment, components and computer software carriers containing TEA5.

In this case, the TETRA manufacturer shall require the third party to sign two copies of the Confidentiality and Restricted Usage Undertaking for installers, repairers and destruction of TEA5 (see annex C). The TETRA manufacturer shall send these to the TEA5 Custodian together with a nomination letter signed by the manufacturer.

The TEA5 Custodian then enters the details in the TEA5 Register, countersigns the Confidentiality and Restricted Usage Undertakings, returns one of these together with a covering letter to the TETRA manufacturer, and files the other and a copy of the letter in the TEA5 File.

The TETRA manufacturer is responsible for passing (a copy of) the countersigned Confidentiality and Restricted Usage Undertaking to the third party installer, repairer or destruction organization.

NOTE 1: The TEA5 Custodian will not sign the Confidentiality and Restricted Usage Undertaking for an Installer/Repairer/Destruction Licence unless it is supported by a nomination letter signed by an organization possessing a manufacturer's licence.

NOTE 2: The TETRA manufacturer is responsible for checking that the nominated Installer/Repairer/Destruction organization complies with the relevant national security policies (e.g. with regard to the removal of key material).

NOTE 3: The TEA5 Custodian may check the suitability of the organization with respect to the relevant national legislation before granting an Installer/Repairer/Destruction licence.

NOTE 4: An organization may be granted multiple Installer/Repairer/Destruction licences, each nominated by a different manufacturer.

NOTE 5: If a manufacturer writes to the TEA5 Custodian withdrawing its nomination for an Installer/Repairer/Destruction licence, the TEA5 Custodian will revoke that licence.

NOTE 6: This licence is not required by an organization that only handles complete radio equipment, e.g. for the purpose of installation into a building or vehicle. (A supplier licence may be more suitable). This licence is required by an organization that opens radio equipment for repair of components containing TEA5 or installs executable code containing TEA5 into complete radio equipment.

NOTE 7: This licence is not required by an organization that only destroys equipment and components on behalf of a user. (A destruction licence may be more suitable). This licence is required by an organization that destroys computer software carriers.

6.3 Supplier Licence

A TETRA manufacturer that has obtained a TEA5 manufacturer licence may be allowed, subject to national legislation, to distribute TETRA equipment containing TEA5 via a supplier.

NOTE 1: There may be one or more suppliers between the manufacturer and the end user, and the following process applies to each supplier.

The TETRA manufacturer has to get the supplier to sign two copies of the Confidentiality and Restricted Usage Undertaking for Suppliers (see annex D). The TETRA manufacturer then sends these to the TEA5 Custodian.

The TEA5 Custodian then enters the transfer details in the TEA5 Register, countersigns the Confidentiality and Restricted Usage Undertakings, returns one of these together with a covering letter to the TETRA manufacturer, and files the other and a copy of the letter in the TEA5 File.

The TETRA manufacturer is responsible for passing (a copy of) the countersigned Confidentiality and Restricted Usage Undertaking to the supplier.

There may be a third party operator who is not a primary or secondary user, but who is supplying TETRA services with TEA5 to primary and/or secondary users or end users.

In this case, the third party operator shall demonstrate to the TEA5 Custodian that he meets the approval criteria (see clause 8.1) and shall send two signed copies of the Confidentiality and Restricted Usage Undertaking for Suppliers (see annex D) to the TEA5 Custodian.

If the TEA5 Custodian is satisfied that the third party operator meets the approval criteria as listed in clause 8.1, the TEA5 Custodian enters the transfer details in the TEA5 Register, countersigns the Confidentiality and Restricted Usage Undertakings, returns one of these together with a covering letter to the third party operator, and files the other and a copy of the letter in the TEA5 File.

NOTE 2: This licence is suitable for an organization that installs complete radio equipment into e.g. a building or vehicle. It is not suitable for an organization that opens radio equipment for repair of components containing TEA5 or installs executable code containing TEA5 into radio equipment.

6.4 Primary User Licence

The applicant for a primary user licence (see clause 5.1) of TETRA equipment containing TEA5 shall provide to the TEA5 Custodian written approval to operate a TETRA network given by the governmental organization that is responsible for public safety in the home state or territory. The applicant for a primary user licence shall sign two copies of the Confidentiality and Restricted Usage Undertaking for Primary and Secondary Users of TEA5 as in annex E. The applicant shall then send these to the TEA5 Custodian.

If the TEA5 Custodian is satisfied that the applicant meets the required criteria as listed in clause 8.1, the TEA5 Custodian enters the details in the TEA5 Register, countersigns the Confidentiality and Restricted Usage Undertakings, returns one of these together with a covering letter to the now approved primary user, and files the other and a copy of the letter in the TEA5 File.

6.5 Secondary User Licence

As described in clause 5.1 a military organization can become an approved recipient of a secondary user licence. Such a military organization is referred to as a secondary user.

There are two cases:

- 1) There is a primary user in the home state or territory that is responsible for the public safety network containing TEA5.
- 2) There is no such primary user in the home state or territory.

In the first case, the primary user has to ensure that the intended secondary user meets the approval criteria (i.e. fulfils Approval Criterion C9 as in clause 8.1). The primary user asks the intended secondary user to sign two copies of the Confidentiality and Restricted Usage Undertaking for Primary and Secondary Users of TEA5 as in annex E. The primary user then sends these to the TEA5 Custodian.

The TEA5 Custodian then enters the transfer details in the TEA5 Register, countersigns the Confidentiality and Restricted Usage Undertakings, returns one of these to the primary user together with a covering letter and files the other and a copy of the letter in the TEA5 File. The primary user transfers the Confidentiality and Restricted Usage Undertaking to the now approved secondary user.

In the second case the applicant for a secondary user licence shall provide to the TEA5 Custodian written approval to operate a TETRA network given by the governmental organization that is responsible for public safety in the home state or territory. The applicant for a secondary user licence shall sign two copies of the Confidentiality and Restricted Usage Undertaking for Users of TEA5 as in annex E. The secondary user shall then send these to the TEA5 Custodian. If the TEA5 Custodian is satisfied that the applicant meets the required criteria as listed in clause 8.1, the TEA5 Custodian then enters the transfer details in the TEA5 Register, countersigns the Confidentiality and Restricted Usage Undertakings, returns one of these together with a covering letter to the now approved secondary user, and files the other and a copy of the letter in the TEA5 File.

6.6 End User Licence

An organization which has already been approved as a primary user or as a secondary user and has obtained a TEA5 primary or secondary user licence may act as a licensor for end users in the area of jurisdiction of the primary or secondary user. In this case, the primary user or secondary user (hereinafter referred to as the first organization) shall ensure that the end user (hereinafter referred to as the second organization) meets the approval criteria. The first organization shall require the second organization to sign two copies of the Confidentiality and Restricted Usage Undertaking for End users of TEA5 as in annex F. The first organization shall maintain a record of the end users with whom it has signed a CRUU. CRUUs signed in accordance with this process may be 'time limited' as determined by the primary or secondary user to meet their operational needs.

NOTE: The primary or secondary user is responsible for checking that its end users comply with the relevant national security policies.

If no primary or secondary user exists in a particular area of jurisdiction, an end user in that area of jurisdiction shall obtain its end user licence directly from the TEA5 Custodian. In that case, the TEA5 Custodian shall require the end user to demonstrate its suitability to receive an end user licence and shall require the end user to sign two copies of the Confidentiality and Restricted Usage Undertaking for End Users of TEA5 as in annex F. The TEA5 Custodian shall maintain a record of the end users with whom it has signed CRUUs. CRUUs signed in accordance with this process may be 'time limited' as determined by the TEA5 Custodian.

6.7 Destruction Licence

An organization that destroys equipment or components containing TEA5 requires a manufacturer licence (see clause 6.1), an installer/repairer/destruction licence (see clause 6.2) or a destruction licence.

An organization that possesses a primary user licence or secondary user licence may licence a third party to destroy equipment and components containing TEA5.

In this case, the primary or secondary user shall require the third party to sign two copies of the Confidentiality and Restricted Usage Undertaking for destruction (see annex G).

The primary or secondary user is responsible for passing (a copy of) the countersigned Confidentiality and Restricted Usage Undertaking to the third party destruction organization.

NOTE 1: The primary or secondary user is responsible for checking that its destruction facilities comply with the relevant national security policies.

NOTE 2: This licence is only suitable for an organization that destroys equipment and components. An organization that destroys computer software carriers requires an Installer/Repairer/Destruction Licence (see annex C).

6.8 Exceptional

In the event that an organization cannot comply with the rules as described in the present document, the TEA5 Custodian may still decide, on an exceptional basis, to distribute the TEA5 specifications to this organization. In this case the TEA5 Custodian will inform ETSI TC TCCE about the decision and at the same time provide a motivation. If a special Confidentiality and Restricted Usage Undertaking is used, the TEA5 Custodian will first ask the ETSI Legal Department to approve this Confidentiality and Restricted Usage Undertaking (CRUU).

7 Distribution procedures

7.1 Distribution of parts 1, 2 and 3 of the TEA5 specification by the TEA5 Custodian

This clause describes the procedure for the distribution of parts 1, 2 and 3 of the TEA5 specification (see clause 1) when requested together. See clause 7.2 for the procedure for distribution of part 3 as a separate item.

The TEA5 Custodian is responsible for determining whether an applicant is qualified to receive the TEA5 specification.

The TEA5 Custodian is responsible for signing TEA5 Confidentiality and Restricted Usage Undertakings with qualified applicants who require access to the TEA5 specifications.

The TEA5 Custodian is responsible for sending copies of the TEA5 specification to qualified applicants.

The following procedure for distributing TEA5 specifications is defined with reference to figure 1.

- 1) The TEA5 Custodian receives a written request for N copies of the TEA5 specification parts 1, 2 and 3 (see notes 1 and 2) or a written request for entering into a Confidentiality and Restricted Usage Undertaking concerning TETRA equipment and/or components containing TEA5.
- 2) The TEA5 Custodian determines whether the requesting organization meets the approval criteria (see clause 8).
- 3) If the request is not approved, the TEA5 Custodian informs the requesting organization that its request has not been approved.
- 4) If the request is approved, the TEA5 Custodian dispatches 2 copies of the corresponding Confidentiality and Restricted Usage Undertaking (as given in annex B) for signature by the approved recipient (see notes 2 and 6) together with a copy of the present document (Rules for the Management of the TETRA Standard Encryption Algorithm TEA5).
- 5) Both copies of the Confidentiality and Restricted Usage Undertaking have to be signed by the approved recipient (see notes 5 and 7) and returned to the TEA5 Custodian, together with the payment of charges (if any).
- 6) The TEA5 Custodian sends up to N (see note 3) numbered copies of the TEA5 specification parts 1, 2 and 3 to the approved recipient and one countersigned copy of the returned Confidentiality and Restricted Usage Undertaking and a covering letter (see notes 4 and 6).

- 7) The TEA5 Custodian updates the TEA5 Register by recording the name and address of the recipient, the numbers of the copies of the TEA5 specification delivered, if any, and the date of delivery. If the original request is not approved, the TEA5 Custodian records the name and address of the requesting organization and the reason for rejecting the request in the TEA5 Register (see also note 8).
- 8) The TEA5 Custodian countersigns and files the second returned copy of the Confidentiality and Restricted Usage Undertaking in the TEA5 File together with a copy of the covering letter sent to the approved recipient.
- 9) The TEA5 Custodian may provide very limited technical advice with respect to answering questions concerning the TEA5 specification.
- 10) If there is a change in the contact details of the signatory or name or ownership of the organization, the organization shall inform the TEA5 Custodian.
- 11) All copies of the TEA5 specification shall be returned to the TEA5 Custodian when they are no longer required by the organization that received them (see note 8).

NOTE 1: Requests for the TEA5 specification may be made directly to the TEA5 Custodian or through ETSI.

NOTE 2: The Confidentiality and Restricted Usage Undertaking specifies the number of copies requested.

NOTE 3: N may be 0. In the event that specifications of TEA5 are delivered, the covering letter specifies the numbers of the copies delivered.

NOTE 4: If the request is approved, the TEA5 Custodian sends all items listed in annex A. Requests for part of the package of items will be rejected.

NOTE 5: An organization may request the specification on behalf of a second organization. In this case, the first organization is responsible for returning a Confidentiality and Restricted Usage Undertaking signed by the second organization. Refer to the details given in clause 6.8.

NOTE 6: Under normal circumstances the TEA5 Custodian is expected to respond within 25 working days, excluding the delay of the procedures with the Customs Services.

NOTE 7: The approved recipient is represented by its authorized officers.

NOTE 8: If a TEA5 specification is returned to the TEA5 Custodian (for example the recipient may decide not to make use of the information), then the TEA5 Custodian destroys the specification and enters a note to this effect in the TEA5 Register.

NOTE 9: The TEA5 Custodian may check the suitability of the applicant with respect to relevant national security policies before granting a licence.

7.2 Distribution of part 3 of the TEA5 specification by the TEA5 Custodian

The following procedure is defined for distributing only part 3 of the TEA5 specification:

- 1) The TEA5 Custodian receives a written request for one single copy of the TEA5 specification part 3.
- 2) The TEA5 Custodian sends one copy of the requested part 3 of the TEA5 specification part 3 to the applicant.

8 Approval criteria and restrictions

8.1 Approval Criteria

The approval criteria are set by the ETSI TC TCCE and maintained by the TEA5 Custodian. The TEA5 Custodian may recommend changes to these criteria.

The TEA5 Custodian will decide whether an organization requesting the TEA5 specification may be considered to be an approved recipient. Where an organization consists of a group of companies or organizations, the TEA5 Custodian will decide whether one organization or company within the group may be an approved recipient on behalf of other organizations or companies within the group.

In order for an organization to be considered an approved recipient of TEA5 specifications it shall be located in one of the states or territories listed in the TEA5 Custodian's list of States and Territories (Annex H is an example). In addition, it shall satisfy at least one of the following criteria:

- C1 The organization is a bona fide designer or manufacturer of TETRA subscriber or fixed network equipment, where the algorithm requested is included in the systems.
- C2 The organization is a bona fide designer or manufacturer of components for TETRA subscriber or fixed network equipment, where at least one of the components includes the algorithm requested.
- C3 The organization is a bona fide designer or manufacturer of a TETRA system simulator for approval testing of TETRA subscriber or fixed network equipment, where the simulator includes the algorithm requested.
- C4 The organization has provided the TEA5 Custodian with exceptional reasons that have been approved by the TEA5 Custodian.

The TEA5 Custodian will decide whether an organization requesting the TEA5 licence may be considered to be an approved recipient.

In order for an organization to be considered an approved recipient of a TEA5 licence it shall be located in one of the states or territories listed in the TEA5 Custodian's list of States and Territories (annex H is an example). In addition, it shall satisfy at least one of the criteria C1 to C4 (above) or one of the following criteria:

- C5 The organization has been appointed by a TETRA manufacturer as an installer and/or repairer and/or destroyer of TETRA equipment or components containing the TEA5 algorithm.
- C6 The organization has been appointed by a TETRA manufacturer as a supplier of equipment containing the TEA5 algorithm.
- C7 The organization operates a TETRA fixed network using TEA5 that provides communication services to primary and/or secondary users or to end users.
- C8 The organization is a governmental organization for a network that is primarily used by public safety organizations in its own state or territory as listed in the TEA5 Custodian's list of States and Territories (annex H is an example). This is referred to as a primary user.
- C9 The organization is a military organization operating a TETRA network in a state or territory where also a TETRA network of a primary user is in operation (see note). This is referred to as a secondary user.

NOTE: In this case the primary user has to arrange the signing of Confidentiality and Restricted Usage Undertakings as specified in clause 6.5.

- C10 The organization is a military organization operating a TETRA network in a state or territory as listed in the TEA5 Custodian's list of States and Territories (annex H is an example) where there is no public safety TETRA network but where written approval to operate a TETRA network by the governmental organization that is responsible for public safety has been demonstrated. This is referred to as a secondary user.
- C11 The organization has been appointed by a primary or secondary user as an end user of TEA5.
- C12 No primary or secondary user exists in a particular area of jurisdiction and the organization has demonstrated to the TEA5 Custodian that it is a public safety organization operating in that area of jurisdiction.
- C13 The organization has been appointed by a primary or secondary user as a destroyer of TETRA equipment or components containing the TEA5 algorithm.

8.2 Revocation of TEA5 licences

The TEA5 Custodian reserves the right to revoke any TEA5 licence and require return of all related documentation in case of:

- any of the approval criteria ceasing to apply;
- expiry of a time limited licence;
- any breach of the Licensee undertakings as contained in the relevant CRUU;
- written withdrawal of the manufacturer's nomination for an Installer/Repairer/Destruction licence;
- a change in relevant national security policies.

8.3 Appeal against Licence Revocation

Appeals against revocation are initially to be addressed to, and considered by the TEA5 Custodian and thereafter may be referred to ETSI TC TCCE for a final decision.

9 The TEA5 Custodian

9.1 Responsibilities

The TEA5 Custodian is expected to perform the following tasks:

- T1 To approve requests for TEA5 or an exchange for a Confidentiality and Restricted Usage Undertaking by reference to the Approval Criteria given in clause 8.
- T2 To exchange the Confidentiality and Restricted Usage Undertaking with approved recipients as described in clauses 6 and 7.
- T3 To obtain the Administrative authorization and export licences required by the Customs Services of its country if any.
- T4 To distribute, if required and approved, the TEA5 specifications as detailed in clause 7 (see note 1).
- T5 To maintain the TEA5 Register as described in clauses 6 and 7.1.
- T6 To hold in custody the contents of the TEA5 File as specified in clauses 6 and 7.1.
- T7 To provide recipients of TEA5 with limited technical support, i.e. answer written queries arising from the specification or test data (see note 2).
- T8 To advise ETSI/ETSI TC TCCE of any problems arising with the approval criteria.
- T9 In the light of written queries from recipients of the TEA5 specifications, to make recommendations to ETSI/ETSI TC TCCE for improvements/corrections to the specification and, subject to ETSI/ETSI TC TCCE approval, make and distribute the changes (see note 3).
- T10 To provide ETSI/ETSI TC TCCE with information from the TEA5 Register when requested to do so.
- T11 To monitor published advances in cryptanalysis and advise the ETSI TC TCCE of any advances which have a significant impact upon the continued suitability of TEA5 for the TETRA application.

NOTE 1: For the distribution of TEA5 specifications registered postage will be used. If recipients require a different delivery service then they will be expected to pay the full costs.

NOTE 2: The TEA5 Custodian will only endeavour to answer questions relating to the TEA5 specifications. The TEA5 custodian is not expected to provide technical support for development programmes.

NOTE 3: Numbered copies of any changes to the TEA5 specifications will be automatically distributed to all recipients of the specification and a record of the distribution entered in the TEA5 Register.

9.2 Appointment

The TEA5 Custodian is agreed by the ETSI Secretariat (as owner of TEA5) and ETSI Technical Committee TETRA and Critical Communications Evolution as:

The TETRA + Critical Communications Association

Custodianship is entrusted to the chair of the Security and Fraud Prevention Group (SFPG) who should be a non-commercial member of the TETRA + Critical Communications Association. Where this is not the case it will revert to the Chief Executive Officer of the TETRA + Critical Communications Association.

The contact person is:

The SFPG secretary

e-mail: SFPG@TCCA.info

The TEA5 Custodian will ask a fee from the recipient to cover the cost of distribution of the CRUU's and parts 1 and 2 of the specifications. The fees are set out in table 1 for each licensee type and item as specified in annex A. The fees are subject to review. The TEA5 Custodian may ask an optional fee from the recipient to cover the cost of distribution of part 3 of the specifications.

All requests for either the TEA5 specification parts 1 and 2 or the TEA5 specification part 3 should be addressed to the indicated contact person.

Table 1: Fees for distribution of TEA5 (as of September 2022)

Licensee	ITEM-1 (Parts 1 and 2 of the specification)	ITEM-2 (CRUU) (see note 1)	ITEM-3 (Covering letter)	Part 3 of specification
Manufacturer	500 €/numbered copy	500 €	No charge	Discretionary
Supplier	Not provided	500 €	No charge	Not provided
Installer/Repairer/Destruction	Not provided	500 €	No charge	Not provided
Primary and Secondary User	Not provided	500 €	No charge	Discretionary
End user managed by a primary or secondary user	Not provided	Discretionary (see note 2)	No charge	Not provided
End user applying directly to the TEA5 Custodian	Not provided	500 €	No charge	Not provided
Destruction	Not provided	500 €	No charge	Not provided
Exceptional	500 €/numbered copy	500 €	No charge	Discretionary

NOTE 1: Each registration of a CRUU invokes a fee due of 500 € from the registering party.
NOTE 2: A fee may be applied at the discretion of the primary or secondary user.

Annex A (informative): Items delivered to approved recipient of TEA5 specifications

ITEM-1: Up to N numbered paper copies to the TEA5 specification (parts 1, 2 and 3), where N is the number of copies approved (see note).

ITEM-2: A countersigned Confidentiality and Restricted Usage Undertaking.

ITEM-3: A cover letter from and signed by the TEA5 Custodian listing the delivered items (ITEMS-1 and-2) and the numbers of the specifications delivered.

NOTE: Only in the case where copies of TEA5 parts 1, 2 and 3 are requested and approved.

In all cases one copy of the present document will be delivered to each signatory of the CRUU.

Annex B (normative): Confidentiality and Restricted Usage Undertaking for Manufacturers of TEA5

CONFIDENTIALITY AND RESTRICTED USAGE UNDERTAKING

relating to

the TEA5 algorithm for the protection of the information exchanged over the radio channels of the Terrestrial Trunked Radio (TETRA) System.

Between

(COMPANY NAME)

(COMPANY ADDRESS)

.....

.....

VAT registration no.

hereinafter called: the LICENSEE;

and

(COMPANY NAME)

(COMPANY ADDRESS)

.....

.....

hereinafter called: the CUSTODIAN.

Whereas

The LICENSEE declares, supported by additional information provided, that he fulfils at least one of the following criteria:

- He is a bona fide designer or manufacturer of TETRA subscriber or fixed network equipment where TETRA Standard Encryption Algorithm 5 (hereinafter referred to as TEA5) is included in the equipment.
- He is a bona fide designer or manufacturer of components for TETRA subscriber or fixed network equipment where at least one of the components includes TEA5.
- He is a bona fide designer or manufacturer of TETRA system simulators for approval testing of TETRA subscriber or fixed network equipment where the simulator includes TEA5.

The CUSTODIAN undertakes to give to the LICENSEE:

- Registered copies of the detailed specification of the confidentiality algorithm TEA5 parts 1 and 2 for protection of the information exchanged over the radio channels of a TETRA system.

The LICENSEE undertakes to:

- 1) keep strictly confidential all information contained in the detailed specification of TEA5 (if provided) and all related communications written or verbal which have been associated with that information after the signature of the present undertaking (the "INFORMATION").
- 2) take measures to ensure that his personnel do not disclose to third parties, without prior and explicit authorization in writing by the CUSTODIAN, all or part of the INFORMATION.
- 3) use the INFORMATION in the TEA5 specification exclusively for the provision of TETRA components, systems or services, thus refraining from making any other use of TEA5 or information in the TEA5 specification.
- 4) design his equipment in a manner that protects TEA5 from disclosure and ensures that it cannot be used for any purpose other than to provide the TETRA air interface security services for which it is intended.

These services are specified in the following standards:

ETSI EN 300 392-7: "Terrestrial Trunked Radio (TETRA); Voice plus Data (V+D); Part 7: Security";
and

ETSI EN 300 396-6: "Terrestrial Trunked Radio (TETRA); Direct Mode Operation (DMO);
Part 6: Security".

TEA5 shall not be used to provide the end-to-end security services described in these standards.

- 5) provide equipment and components containing TEA5 for TETRA applications only to an organization which has signed the appropriate TEA5 Confidentiality and Restricted Usage Undertaking (as in annexes B to G) with the TEA5 Custodian or primary or secondary user. Before supplying equipment incorporating TEA5, the LICENSEE undertakes to verify that this organization possesses a copy of the respective TEA5 Confidentiality and Restricted Usage Undertaking which is countersigned by the Custodian or primary or secondary user. Where the equipment is being provided to an end user, the manufacturer undertakes to verify that he has validated this end user with the primary or secondary user or the TEA5 Custodian within the previous twelve months.
- 6) check that any organization that he nominates for receipt of an Installer/Repairer/Destruction licence complies with the relevant national security policies.
- 7) provide computer software carriers containing TEA5 for TETRA applications only to an installer, repairer or destroyer of equipment or components containing TEA5 who has signed a Confidentiality and Restricted Usage Undertaking for installers, repairers and destroyers of equipment containing TEA5 with the Custodian (as in annex C). Before providing computer software carriers containing TEA5, the LICENSEE undertakes to verify that this installer, repairer or destroyer possesses a copy of the Confidentiality and Restricted Usage Undertaking for installers, repairers and destroyers of equipment containing TEA5 which is countersigned by the Custodian.

The LICENSEE undertakes NOT to:

- 8) make copies of the TEA5 specifications (all copies of these specifications shall be produced, numbered and registered by the CUSTODIAN).
- 9) disclose the INFORMATION to any third party without prior and explicit authorization in writing by the CUSTODIAN.
- 10) register, or attempt to register, any IPR (patents or the like rights) relating to TEA5 and containing all or part of the INFORMATION.
- 11) subcontract any part of the design and build of his equipment, or the provision of his TETRA services, which requires knowledge of TEA5, to any organization which has not signed the Confidentiality and Restricted Usage Undertaking.
- 12) publish a description or analysis of any aspects which may disclose the operation of TEA5 in any document that is circulated outside the premises of the LICENSEE.
- 13) export the TEA5 specification to any territory outside the list of TEA5 approved states maintained by the TEA5 Custodian.

- 14) export TEA5 components or equipment containing TEA5 to any territory outside the list of TEA5 approved states maintained by the TEA5 Custodian without the prior agreement of the TEA5 Custodian.

The above restrictions do not apply to information which:

- is or subsequently becomes (other than by breach by the LICENSEE of its obligations under this agreement) public knowledge; or
- is received by the LICENSEE without restriction on disclosure or use from a third party and without breach by a third party of any obligations of confidentiality to the CUSTODIAN.

If, after five years from the effective date hereof, the LICENSEE has not used the INFORMATION, or if he is no longer active in the business mentioned above, he shall return the written INFORMATION which he has received. The LICENSEE is not authorized to keep copies or photocopies; it is forbidden for him to make any further use of the INFORMATION.

In the event that the LICENSEE breaches the obligations of confidentiality imposed on him pursuant to the undertakings above and ETSI demonstrates that it has suffered loss as a direct result of such breach, the LICENSEE agrees to indemnify ETSI for such reasonable losses which are a direct result of such breach. The LICENSEE may not be held liable for any indirect or consequential or incidental losses (including loss of profits) suffered by any third party claiming against ETSI.

All disputes which derive from the present undertaking or its interpretation will be settled by the Court of Justice located in Grasse (Alpes Maritimes) and with the application of French Law regarding questions of interpretation.

The obligations of confidentiality herein will not apply vis-à-vis other LICENSEES. Evidence of being a LICENSEE will be given by providing a certified copy of this undertaking duly undersigned.

This undertaking supersedes all prior confidentiality and restricted scope undertakings between the parties and constitutes the entire agreement between the parties. All amendments to this undertaking will be agreed in writing and signed by a duly authorized representative of each of the parties.

Made in two originals, one of which is for the CUSTODIAN, the other for the LICENSEE.

Annex C (normative): Confidentiality and Restricted Usage Undertaking for Installers, Repairers and Destruction of TEA5

CONFIDENTIALITY AND RESTRICTED USAGE UNDERTAKING

relating to

the installation, repair and destruction of equipment and components containing the TEA5 algorithm for the protection of the information exchanged over the radio channels of the Terrestrial Trunked Radio (TETRA) System.

Between

(COMPANY NAME)

(COMPANY ADDRESS)

VAT registration no.

hereinafter called: the LICENSEE;

and

(COMPANY NAME)

(COMPANY ADDRESS)

hereinafter called: the CUSTODIAN.

Whereas

The LICENSEE has demonstrated that he fulfils at least one of the following criteria:

- He is an installer of hardware or software components containing TEA5 into subscriber equipment, fixed network equipment or system simulators.
- He is a repairer of subscriber equipment, fixed network equipment, or system simulators in which TEA5 is included.
- He destroys equipment, components or computer software carriers containing TEA5.

The LICENSEE undertakes to:

- 1) provide equipment and components containing TEA5 only to an organization which has signed the appropriate TEA5 Confidentiality and Restricted Usage Undertaking (as in annexes B to G) with the CUSTODIAN or a primary or secondary user. Before supplying equipment or components containing TEA5 or returning repaired equipment or components containing TEA5, the LICENSEE undertakes to verify that the organization possesses a copy of the appropriate TEA5 Confidentiality and Restricted Usage Undertaking which has been countersigned by the CUSTODIAN or a primary or secondary user. Where the equipment or components are being provided to an end user, the LICENSEE undertakes to verify that he has validated the end user with the primary or secondary user or the TEA5 Custodian within the previous twelve months.
- 2) irrevocably destroy all equipment, components and computer software carriers containing TEA5 that have been supplied to him for destruction.
- 3) provide computer software carriers containing TEA5 only to an organization which has signed a TEA5 Confidentiality and Restricted Usage Undertaking for a manufacturer (as in annex B) or a TEA5 Confidentiality and Restricted Usage Undertaking for an installer/repairer/destruction (as in annex C). Before supplying computer software carriers containing TEA5 the LICENSEE undertakes to verify that the organization possesses a copy of the appropriate TEA5 Confidentiality and Restricted Usage Undertaking which has been countersigned by the CUSTODIAN.
- 4) comply with the relevant national security policies.

The LICENSEE undertakes NOT to:

- 5) export components or equipment containing TEA5 to any territory outside the list of TEA5 approved states maintained by the TEA5 Custodian.

The above restrictions do not apply to information which:

- is or subsequently becomes (other than by breach by the LICENSEE of its obligations under this agreement) public knowledge; or
- is received by the LICENSEE without restriction on disclosure or use from a third party and without breach by a third party of any obligations of confidentiality to the CUSTODIAN.

In the event that the LICENSEE breaches the obligations imposed on him pursuant to the undertakings above and ETSI demonstrates that it has suffered loss as a direct result of such breach, the LICENSEE agrees to indemnify ETSI for such reasonable losses which are a direct result of such breach. The LICENSEE may not be held liable for any indirect or consequential or incidental losses (including loss of profits) suffered by any third party claiming against ETSI.

All disputes which derive from the present undertaking or its interpretation will be settled by the Court of Justice located in Grasse (Alpes Maritimes) and with the application of French Law regarding questions of interpretation.

The LICENSEE declares, supported by additional information provided, that he fulfils at least one of the following criteria:

- The organization has been identified by the primary user as a legitimate end user of a network that is primarily used by public safety organizations in their own state or territory as listed in the TEA5 state and territory list that is maintained by the custodian.
- The organization has been identified by the secondary user as a legitimate end user of a network that is primarily used by public safety organizations in their own state or territory as listed in the TEA5 state and territory list that is maintained by the custodian.
- The organization has been acknowledged by the CUSTODIAN as a legitimate end user of a network that is primarily used by public safety organizations in a state or territory listed in the TEA5 state and territory list that is maintained by the CUSTODIAN, and no primary or secondary user has been appointed in that state or territory.

Annex G (normative): Confidentiality and Restricted Usage Undertaking for Destruction of TEA5

CONFIDENTIALITY AND RESTRICTED USAGE UNDERTAKING

relating to

the destruction of equipment and components containing the TEA5 algorithm for the protection of the information exchanged over the radio channels of the Terrestrial Trunked Radio (TETRA) System.

Between

(COMPANY NAME)

(COMPANY ADDRESS)

VAT registration no.

hereinafter called: the LICENSEE;

and

(COMPANY NAME)

(COMPANY ADDRESS)

hereinafter called: the USER.

NOTE: Only primary and secondary users may adopt the role of USER for the purposes of this CRUU.

Whereas

- The LICENSEE has demonstrated that he destroys equipment or components containing TEA5.
- The LICENSEE undertakes to irrevocably destroy all equipment and components containing TEA5 that have been supplied to him for destruction, in accordance with the relevant national security policies.
- The LICENSEE undertakes NOT to export components or equipment containing TEA5 to any territory outside the list of TEA5 approved states maintained by the TEA5 Custodian.

In the event that the LICENSEE breaches the obligations imposed on him pursuant to the undertaking above and ETSI demonstrates that it has suffered loss as a direct result of such breach, the LICENSEE agrees to indemnify ETSI for such reasonable losses which are a direct result of such breach. The LICENSEE may not be held liable for any indirect or consequential or incidental losses (including loss of profits) suffered by any third party claiming against ETSI.

All disputes which derive from the present undertaking or its interpretation will be settled by the Court of Justice located in Grasse (Alpes Maritimes) and with the application of French Law regarding questions of interpretation.

The obligations of confidentiality herein will not apply vis-à-vis other LICENSEES. Evidence of being a LICENSEE will be given by providing a certified copy of this undertaking duly undersigned.

This undertaking supersedes all prior confidentiality and restricted scope undertakings between the parties and constitutes the entire agreement between the parties. All amendments to this undertaking will be agreed in writing and signed by a duly authorized representative of each of the parties.

Made in two originals, one of which is for the USER, the other for the LICENSEE.

Annex H (informative): TEA5 State and Territories list

The list below is an exemplary list showing in which countries TEA5 may be used. The TEA5 Custodian maintains the definitive list of States and Territories.

Category: State/territory:	Can use TEA5
Albania	Yes
Andorra	Yes
Austria	Yes
Belgium	Yes
Bosnia & Herzegovina	Yes
Bulgaria	Yes
Channel Islands	Yes
Croatia	Yes
Cyprus	Yes
Czech republic	Yes
Denmark	Yes
Estonia	Yes
Faroe Islands	Yes
Finland	Yes
France	Yes
Germany	Yes
Gibraltar	Yes
Greece	Yes
Hungary	Yes
Iceland	Yes
Ireland	Yes
Isle of Man	Yes
Italy	Yes
Latvia	Yes
Liechtenstein	Yes
Lithuania	Yes
Luxembourg	Yes
North Macedonia	Yes
Malta	Yes
Monaco	Yes
Montenegro	Yes
Netherlands	Yes
Norway	Yes
Poland	Yes
Portugal	Yes
Romania	Yes
San Marino	Yes
Serbia	Yes
Slovakia	Yes
Slovenia	Yes
Spain	Yes
Svalbard	Yes
Sweden	Yes
Switzerland	Yes
United Kingdom	Yes
Vatican	Yes
Other states/territories	No

Annex I (informative): Bibliography

- ETSI TS 101 053-1: "Rules for the management of the TETRA standard encryption algorithms; Part 1: TEA1".
- ETSI TS 101 053-2: "Rules for the management of the TETRA standard encryption algorithms; Part 2: TEA2".
- ETSI TS 101 053-3: "Rules for the management of the TETRA standard encryption algorithms; Part 3: TEA3".
- ETSI TS 101 053-4: "Rules for the management of the TETRA standard encryption algorithms; Part 4: TEA4".
- ETSI TS 101 053-6: "Rules for the management of the TETRA standard encryption algorithms; Part 6: TEA6".
- ETSI TS 101 053-7: "Rules for the management of the TETRA standard encryption algorithms; Part 7: TEA7".
