Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (https://ipr.etsi.org/).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

Foreword

This Technical Specification (TS) has been produced by ETSI Technical Committee Intelligent Transport Systems (ITS).

Modal verbs terminology

In the present document "shall", "shall not", "should", "should not", "may", "need not", "will", "will not", "can" and "cannot" are to be interpreted as described in clause 3.2 of the ETSI Drafting Rules (Verbal forms for the expression of provisions).

"must" and "must not" are NOT allowed in ETSI deliverables except when used in direct citation.

Introduction

Facilities layer entities that use the Basic Transport Protocol for the transport of messages need to be identifiable. For this purpose, BTP defines port numbers. The present document specifies the well-known port numbers to be used by facilities layer entities.

1 Scope

The present document defines port number values for the Basic Transport Protocol as specified in ETSI EN 302 636-5-1 [i.1].

2 References

2.1 Normative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

Referenced documents which are not found to be publicly available in the expected location might be found at https://docbox.etsi.org/Reference/.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document.

Not applicable.

2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

[i.1]	ETSI EN 302 636-5-1: "Intelligent Transport Systems (ITS); Vehicular Communications; GeoNetworking; Part 5: Transport Protocols; Sub-part 1: Basic Transport Protocol".
[i.2]	ETSI EN 302 637-2: "Intelligent Transport Systems (ITS); Vehicular Communications; Basic Set of Applications; Part 2: Specification of Cooperative Awareness Basic Service".
[i.3]	ETSI EN 302 637-3: "Intelligent Transport Systems (ITS); Vehicular Communications; Basic Set of Applications; Part 3: Specifications of Decentralized Environmental Notification Basic Service".
[i.4]	ETSI TS 101 556-1 (V1.1.1): "Intelligent Transport Systems (ITS); Infrastructure to Vehicle Communication; Electric Vehicle Charging Spot Notification Specification".
[i.5]	ETSI TS 101 556-2 (V1.1.1): "Intelligent Transport Systems (ITS); Infrastructure to Vehicle Communication; Part 2: Communication system specification to support application requirements for Tyre Information System (TIS) and Tyre Pressure Gauge (TPG) interoperability".
[i.6]	ETSI TS 101 556-3 (V1.1.1): "Intelligent Transport Systems (ITS); Infrastructure to Vehicle Communications; Part 3: Communications system for the planning and reservation of EV energy supply using wireless networks".
[i.7]	ETSI TS 102 890-1 (V1.1.1): "Intelligent Transport Systems (ITS); Facilities layer function; Part 1: Services Announcement (SA) specification".

[i.8]	ETSI TS 102 941 (V1.2.1): "Intelligent Transport Systems (ITS); Security; Trust and Privacy Management".
[i.9]	ETSI TS 103 301 (V1.2.1): "Intelligent Transport Systems (ITS); Vehicular Communications; Basic Set of Applications; Facilities layer protocols and communication requirements for infrastructure services".
[i.10]	ETSI TS 103 152 (V1.1.1): "Intelligent Transport Systems (ITS); V2X Communications; Multimedia Content Dissemination Basic Service specification".

3 Definition of terms, symbols and abbreviations

3.1 Terms

For the purposes of the present document, the following terms apply:

destination port: port identifying the destination's protocol entity at the ITS facilities layer

NOTE: Facilities layer services that do not expect replies either do not include a source port number in the header, or they set it to a default (usually 0) to indicate no reply port available. For session-based services (client-server or peer-to-peer), the source port is often set to a value from an ephemeral (dynamically assigned) subspace of the space of all port numbers.

port: ITS station-internal address that identifies a protocol entity at the facilities layer and represents an endpoint of a logical connection

source port: port number to be used by an facilities layer entity as the destination port in a subsequent reply to the originator

3.2 Symbols

Void.

3.3 Abbreviations

For the purposes of the present document, the following abbreviations apply:

ASN.1 AT	Abstract Syntax Notation One Authorization Ticket
BTP	Basic Transport Protocol
CA	Cooperative Awareness
CAM	Cooperative Awareness Message
CPS	Collective Perception Service
CPM	Collective Perception Message
CRL	Certificate Revocation List
CRLM	Certificate Revocation List Message
CTL	Certificate Trust List
CTLM	Certificate Trust List Message
DEN	Decentralized Environmental Notification
DENM	Decentralized Environmental Notification Message
EC	Enrolment Credential
EOFM	End Of Filling Message
EVCSN	Electric Vehicle Charging Spot Notification
EV-RSR	Electric Vehicle Recharging Spot Reservation
GNSS	Global Navigation Satellite System
GPC	GNSS Positioning Correction
IVI	Infrastructure to Vehicle Information
MCD	Multimedia Content Dissemination

4 Port number values for the Basic Transport Protocol

The Basic Transport Protocol (BTP) [i.1] multiplexes messages from the facilities layer to the networking & transport layer and de-multiplexes received GeoNetworking packets to corresponding entities in the facilities layer. At the networking & transport layer the messages need to be identified so that they can be delivered to the correct facilities layer entity. BTP manages this process.

BTP port numbers are used in BTP service primitives and the BTP headers. In the BTP service primitives *BTP-Data.request* and *BTP-Data.indication* the port numbers are in the (optional) *source port* and *destination port* parameters. In the BTP headers, the port numbers are carried in the *source port* and *destination port* fields.

BTP defines well-known ports, which are used to assign fixed port numbers to specific facilities layer entities. Facilities layer entities that have no well-known port number values assigned shall dynamically use numbers from 3 000 to 65 536.

The well-known BTP port number values shall be used as specified in table 1. They are used by the corresponding facilities layer entities and related applications to allow the identification of the message types.

BTP port number values	Facilities service or Application	Related standard
2 001	CA (CAM)	ETSI EN 302 637-2 [i.2]
2 002	DEN (DENM)	ETSI EN 302 637-3 [i.3]
2 003	RLT (MAPEM)	
2 004	TLM (SPATEM)	ETSI TS 103 301 [i.9]
2 005	SA (SAEM)	ETSI TS 102 890-1 [i.7]
2 006	IVI (IVIM)	
2 007	TLC (SREM)	ETSI TS 103 301 [i.9]
2 008	TLC (SSEM)	
2 009	Allocated for CPS (CPM)	Allocated for "Intelligent Transport System (ITS); Vehicular Communications; Basic Set of Applications; Specification of the Collective Perception Service"
2 010	EVCSN POI (EVCSN POI message)	ETSI TS 101 556-1 [i.4]
2 011	TPG (TRM, TCM, VDRM, VDPM, EOFM)	ETSI TS 101 556-2 [i.5]
2 012	Charging (EV-RSR)	ETSI TS 101 556-3 [i.6]
2 013	GPC (RTCMEM)	ETSI TS 103 301 [i.9]
2 014	CTL (CTLM)	ETSI TS 102 941 [i.8]
2 015	CRL (CRLM)	ETSI TS 102 941 [i.8]
2 016	Certificate request service (EC/AT request)	ETSI TS 102 941 [i.8]
2 017	MCD (MCDM)	ETSI TS 103 152 [i.10]
NOTE: The Facilities service	a naming resembles the naming in ASN
