Introduction

Subscription Management is a feature that permits Service Providers, Value Added Service Providers and Mobile Operators to provision services for a specific subscriber. Subscription Management is an area of Service Operation Management that sets a complex challenge for Service Providers and Operators in their support of new or existing subscribers during their every day network operation.

The present document is part a TS-family covering the 3rd Generation Partnership Project; Technical Specification Group Services and System Aspects; Telecommunication management, as identified below:

TS 32.140: Subscription Management (SuM) requirements.

TS 32.141: Subscription Management (SuM) architecture.

TS 28.751: Subscription Management (SuM) Network Resource Model (NRM) Integration Reference Point (IRP); Requirements.

TS 28.752: Subscription Management (SuM) Network Resource Model (NRM) Integration Reference Point (IRP); Information Service (IS).

TS 28.753: Subscription Management (SuM) Network Resource Model (NRM) Integration Reference Point (IRP); Solution Set (SS) definitions.

1 Scope

The present document defines, in addition to the requirements defined in [1], [2], [3] and [4], requirements for the present IRP: SuM NRM IRP.

2 References

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
