Important notice

The present document can be downloaded from the
[ETSI Search & Browse Standards](#) application.

The present document may be made available in electronic versions and/or in print. The content of any electronic and/or print versions of the present document shall not be modified without the prior written authorization of ETSI. In case of any existing or perceived difference in contents between such versions and/or in print, the prevailing version of an ETSI deliverable is the one made publicly available in PDF format on [ETSI deliver](#) repository.

Users should be aware that the present document may be revised or have its status changed, this information is available in the [Milestones listing](#).

If you find errors in the present document, please send your comments to the relevant service listed under [Committee Support Staff](#).

If you find a security vulnerability in the present document, please report it through our [Coordinated Vulnerability Disclosure \(CVD\)](#) program.

Notice of disclaimer & limitation of liability

The information provided in the present deliverable is directed solely to professionals who have the appropriate degree of experience to understand and interpret its content in accordance with generally accepted engineering or other professional standard and applicable regulations.

No recommendation as to products and services or vendors is made or should be implied.

No representation or warranty is made that this deliverable is technically accurate or sufficient or conforms to any law and/or governmental rule and/or regulation and further, no representation or warranty is made of merchantability or fitness for any particular purpose or against infringement of intellectual property rights.

In no event shall ETSI be held liable for loss of profits or any other incidental or consequential damages.

Any software contained in this deliverable is provided "AS IS" with no warranties, express or implied, including but not limited to, the warranties of merchantability, fitness for a particular purpose and non-infringement of intellectual property rights and ETSI shall not be held liable in any event for any damages whatsoever (including, without limitation, damages for loss of profits, business interruption, loss of information, or any other pecuniary loss) arising out of or related to the use of or inability to use the software.

Copyright Notification

No part may be reproduced or utilized in any form or by any means, electronic or mechanical, including photocopying and microfilm except as authorized by written permission of ETSI.

The content of the PDF version shall not be modified without the written authorization of ETSI.

The copyright and the foregoing restriction extend to reproduction in all media.

Intellectual Property Rights

Essential patents

IPRs essential or potentially essential to normative deliverables may have been declared to ETSI. The declarations pertaining to these essential IPRs, if any, are publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the [ETSI IPR online database](#).

Pursuant to the ETSI Directives including the ETSI IPR Policy, no investigation regarding the essentiality of IPRs, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Trademarks

The present document may include trademarks and/or tradenames which are asserted and/or registered by their owners. ETSI claims no ownership of these except for any which are indicated as being the property of ETSI, and conveys no right to use or reproduce any trademark and/or tradename. Mention of those trademarks in the present document does not constitute an endorsement by ETSI of products, services or organizations associated with those trademarks.

DECT™, **PLUGTESTS™**, **UMTS™** and the ETSI logo are trademarks of ETSI registered for the benefit of its Members. **3GPP™**, **LTE™** and **5G™** logo are trademarks of ETSI registered for the benefit of its Members and of the 3GPP Organizational Partners. **oneM2M™** logo is a trademark of ETSI registered for the benefit of its Members and of the oneM2M Partners. **GSM®** and the GSM logo are trademarks registered and owned by the GSM Association.

Legal Notice

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities. These shall be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between 3GPP and ETSI identities can be found at [3GPP to ETSI numbering cross-referencing](#).

Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

Foreword

This Technical Specification has been produced by the 3rd Generation Partnership Project (3GPP).

The contents of the present document are subject to continuing work within the TSG and may change following formal TSG approval. Should the TSG modify the contents of the present document, it will be re-released by the TSG with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

- x the first digit:
 - 1 presented to TSG for information;
 - 2 presented to TSG for approval;
 - 3 or greater indicates TSG approved document under change control.
- y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- z the third digit is incremented when editorial only changes have been incorporated in the document.

In the present document, modal verbs have the following meanings:

- shall** indicates a mandatory requirement to do something
- shall not** indicates an interdiction (prohibition) to do something

The constructions "shall" and "shall not" are confined to the context of normative provisions, and do not appear in Technical Reports.

The constructions "must" and "must not" are not used as substitutes for "shall" and "shall not". Their use is avoided insofar as possible, and they are not used in a normative context except in a direct citation from an external, referenced, non-3GPP document, or so as to maintain continuity of style when extending or modifying the provisions of such a referenced document.

- should** indicates a recommendation to do something
- should not** indicates a recommendation not to do something
- may** indicates permission to do something
- need not** indicates permission not to do something

The construction "may not" is ambiguous and is not used in normative elements. The unambiguous constructions "might not" or "shall not" are used instead, depending upon the meaning intended.

- can** indicates that something is possible
- cannot** indicates that something is impossible

The constructions "can" and "cannot" are not substitutes for "may" and "need not".

- will** indicates that something is certain or expected to happen as a result of action taken by an agency the behaviour of which is outside the scope of the present document
- will not** indicates that something is certain or expected not to happen as a result of action taken by an agency the behaviour of which is outside the scope of the present document
- might** indicates a likelihood that something will happen as a result of action taken by some agency the behaviour of which is outside the scope of the present document

might not indicates a likelihood that something will not happen as a result of action taken by some agency the behaviour of which is outside the scope of the present document

In addition:

is (or any other verb in the indicative mood) indicates a statement of fact

is not (or any other negative verb in the indicative mood) indicates a statement of fact

The constructions "is" and "is not" do not indicate requirements.

1 Scope

The present document specifies the usage of the Unified Data Repository services for Ambient IoT Data. It provides the resource definition and data model for Ambient IoT data used over the Nudr Service Based Interface. The protocol definition for Nudr Service Based Interface which is specific to Ambient IoT data is also specified in the present document.

The 5G System stage 2 architecture and procedures are specified in 3GPP TS 23.501 [2], 3GPP TS 23.502 [3] and 3GPP TS 23.369 [14].

The stage 3 protocol definition for Nudr Service Based Interface which is common for subscription data, policy data, structure data for exposure, application data and Ambient IoT data is specified in 3GPP TS 29.504 [15].

The Technical Realization of the Service Based Architecture and the Principles and Guidelines for Services Definition are specified in 3GPP TS 29.500 [4] and 3GPP TS 29.501 [5].

2 References

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
- For a specific reference, subsequent revisions do not apply.
- For a non-specific reference, the latest version applies. In the case of a reference to a 3GPP document (including a GSM document), a non-specific reference implicitly refers to the latest version of that document *in the same Release as the present document*.

3 Definitions and abbreviations

3.1 Definitions

For the purposes of the present document, the terms and definitions given in 3GPP TR 21.905 [1] and 3GPP TS 23.369 [14] and the following apply. A term defined in the present document or in 3GPP TS 23.369 [14] takes precedence over the definition of the same term, if any, in 3GPP TR 21.905 [1]. A term defined in the present document takes precedence over the definition of the same term, if any, in 3GPP TS 23.369 [14].

3.2 Abbreviations

For the purposes of the present document, the abbreviations given in 3GPP TR 21.905 [1] and 3GPP TS 23.369 [14] and the following apply. An abbreviation defined in the present document or in 3GPP TS 23.369 [14] takes precedence over the definition of the same abbreviation, if any, in 3GPP TR 21.905 [1]. An abbreviation defined in the present document takes precedence over the definition of the same term, if any, in 3GPP TS 23.369 [14].

4 Overview

The resources, data model and usage defined in the present document are used by the 5GC NFs (e.g., ADM) to access the Ambient IoT data via the Unified Data Repository services specified in 3GPP TS 29.504 [15].

5 Usage of Nudr_DataRepository Service API for Ambient IoT data

5.1 Introduction

The following clauses specify the usage of Nudr_DataRepository service for Ambient IoT data. The principles specified in 3GPP TS 29.504 [15] are followed unless explicitly specified otherwise in the following clauses.

5.2 Resources

5.2.1 Overview

This clause specifies the resources for the usage of the Unified Data Repository service for Ambient IoT data.

5.2.2 Resource Structure

This clause describes the structure for the Resource URIs and the resources and methods used for the service.

Figure 5.2.2-1 depicts the resource URIs structure for the Nudr_DataRepository API for Ambient IoT data.

Figure 5.2.2-1: Resource URI structure of the Nudr_DataRepository API for Ambient IoT data

Table 5.2.2-1 provides an overview of the resources and applicable HTTP methods.

Table 5.2.2-1: Resources and methods overview

Resource name	Resource URI	HTTP method or custom operation	Description
AiotDeviceProfileData	/aiot-data/aiot-device-profile-data/{aiotDevPermId}	GET	Retrieve the AIoT device profile data for an AIoT device permanent identifier.
		PATCH	Modify the AIoT device profile data for an AIoT device permanent identifier.
AfAuthorizationData	/af-authorization-data	GET	Retrieve AF Authorization Data

5.2.3 Resource: AiotDeviceProfileData

5.2.3.1 Description

The resource represents all AIoT device profile data attributes in the UDR for a given "aiotDevPermId".

5.2.3.2 Resource definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/aiot-data/aiot-device-profile-data/{aiotDevPermId}

This resource shall support the resource URI variables defined in table 5.2.3.2-1.

Table 5.2.3.2-1: Resource URI variables for this resource

Name	Data type	Definition
apiRoot	string	See 3GPP TS 29.504 [15] clause 6.1.1
aiotDevPermId	AiotDevPermId	Represents the AIoT device permanent id. Data type AiotDevPermId is defined in 3GPP TS 29.571 [18].

5.2.3.3 Resource Standard Methods

5.2.3.3.1 GET

This method shall support the URI query parameters specified in table 5.2.3.3.1-1.

Table 5.2.3.3.1-1: URI query parameters supported by the GET method on this resource

Name	Data type	P	Cardinality	Description
n/a				

This method shall support the request data structures specified in table 5.2.3.3.1-2 and the response data structures and response codes specified in table 5.2.3.3.1-3.

Table 5.2.3.3.1-2: Data structures supported by the GET Request Body on this resource

Data type	P	Cardinality	Description
n/a			

Table 5.2.3.3.1-3: Data structures supported by the GET Response Body on this resource

Data type	P	Cardinality	Response codes	Description
AiotDeviceProfileData	M	1	200 OK	Upon success, a response body containing AIoT Device Profile Data shall be returned.
ProblemDetails	O	0..1	404 Not Found	The "cause" attribute may be used to indicate one of the following application errors: - DATA_NOT_FOUND
NOTE: The mandatory HTTP error status codes for the GET method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply.				

5.2.3.3.2 PATCH

This method shall support the URI query parameters specified in table 5.2.3.3.2-1.

Table 5.2.3.3.2-1: URI query parameters supported by the PATCH method on this resource

Name	Data type	P	Cardinality	Description
supported-features	SupportedFeatures	O	0..1	The features supported by the NF service consumer.

This method shall support the request data structures specified in table 5.2.3.3.2-2 and the response data structures and response codes specified in table 5.2.3.3.2-3.

Table 5.2.3.3.2-2: Data structures supported by the PATCH Request Body on this resource

Data type	P	Cardinality	Description
AiotDeviceProfileDataPatch	M	1	Modify the aiot device profile data resource for a given AIoT device permanent identifier.

Table 5.2.3.3.2-3: Data structures supported by the PATCH Response Body on this resource

Data type	P	Cardinality	Response codes	Description
n/a			204 No Content	Upon successful modification there is no body in the response message. (NOTE 2)
PatchResult	M	1	200 OK	Upon success, the execution report is returned. (NOTE 2)
ProblemDetails	O	0..1	404 Not Found	The "cause" attribute may be used to indicate one of the following application errors: - DATA_NOT_FOUND
NOTE 1: The mandatory HTTP error status codes for the PATCH method listed in table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply.				
NOTE 2: If all the modification instructions in the PATCH request have been implemented, the UDR shall respond with 204 No Content response; if some of the modification instructions in the PATCH request have been discarded, and the NF service consumer has included in the supported-feature query parameter the "PatchReport" feature number, the UDR shall respond with PatchResult.				

5.2.4 Resource: AfAuthorizationData

5.2.4.1 Description

This resource represents the AF Authorization data.

This resource is modelled as the Document resource archetype (see clause C.1 of 3GPP TS 29.501 [5]).

5.2.4.2 Resource Definition

Resource URI: {apiRoot}/nudr-dr/<apiVersion>/aiot-data/af-authorization-data

This resource shall support the resource URI variables defined in table 5.2.4.2-1.

Table 5.2.4.2-1: Resource URI variables for this resource

Name	Data type	Definition
apiRoot	string	See 3GPP TS 29.504 [15] clause 6.1.1

5.2.4.3 Resource Standard Methods

5.2.4.3.1 GET

This method shall support the URI query parameters specified in table 5.2.4.3.1-1.

Table 5.2.4.3.1-1: URI query parameters supported by the GET method on this resource

Name	Data type	P	Cardinality	Description	Applicability
af-id	Afld	O	0..1	When present, this parameter indicates the AF for whom the Authorization data is to be retrieved. When this IE is absent, it shall indicate that the Authorization Data for all the AFs are to be retrieved.	

This method shall support the request data structures specified in table 5.2.4.3.1-2 and the response data structures and response codes specified in table 5.2.4.3.1-3.

Table 5.2.4.3.1-2: Data structures supported by the GET Request Body on this resource

Data type	P	Cardinality	Description
n/a			

Table 5.2.4.3.1-3: Data structures supported by the GET Response Body on this resource

Data type	P	Cardinality	Response codes	Description
AfAuthorizationData	M	1	200 OK	Upon success, a response body containing the AfAuthorizationData shall be returned.
ProblemDetails	O	0..1	404 Not Found	The "cause" attribute may be used to indicate one of the following application errors: - DATA_NOT_FOUND
NOTE: The mandatory HTTP error status code for the GET method listed in Table 5.2.7.1-1 of 3GPP TS 29.500 [4] also apply.				

5.2.4.4 Resource Custom Operations

None.

5.3 Custom Operations without associated resources

None in this release of the specification.

5.4 Notifications

None in this release of the specification.

5.5 Data Model

5.5.1 General

This clause specifies the application data model supported by the API.

Table 5.5.1-1 specifies the data types defined for the Nudr_DataRepository for AIoT data service-based interface protocol.

Table 5.5.1-1: Nudr_DataRepository specific Data Types for AIoT data

Data type	Section defined	Description	Applicability
AiotDeviceProfileData	5.5.2.2	AIoT Device Profile Data	
AiotDeviceProfileDataPatch	5.5.2.3	AIoT Device Profile Data for patch operation	

Table 5.5.1-2 specifies data types re-used by the Nudr_DataRepository for AIoT Data service based interface protocol from other specifications, including a reference to their respective specifications and when needed, a short description of their use within the Nudr_DataRepository service based interface for Ambient IoT data.

Table 5.5.1-2: Nudr_DataRepository re-used Data Types for AIoT data

Data type	Reference	Comments	Applicability
AiotDevPermlId	3GPP TS 29.571 [18]	AIoT device permanent identifier	
LastKnownAiotfInfo	3GPP TS 29.369 [19]	Last Known AIoT Information	
Tid	3GPP TS 29.369 [19]	Temporary ID (T-ID)	
PatchResult	3GPP TS 29.571 [18]		
ProblemDetails	3GPP TS 29.571 [18]	Used in error responses to provide more detailed information about an error.	
SupportedFeatures	3GPP TS 29.571 [18]	see 3GPP TS 29.500 [4] clause 6.6	
AfAuthorizationData	3GPP TS 29.369 [19]	AF Authorization Data	
AfId	3GPP TS 29.369 [19]	AF ID	

5.5.2 Structured data types

5.5.2.1 Introduction

This clause defines the structures to be used in resource representations.

5.5.2.2 Type AiotDeviceProfileData

Table 5.5.2.2-1: Definition of type AiotDeviceProfileData

Attribute name	Data type	P	Cardinality	Description	Applicability
aiotDevPerMId	AiotDevPerMId	M	1	Globally unique AIoT device permanent identifier	
lastKnownAiotfInfo	LastKnownAiotfInfo	M	1	Indicate the last known AIOTF that serves the AIoT device, or unknown.	
tidCurrent	Tid	O	0..1	Current Temporary Identifier (TIDn).	
tidPrevious	Tid	O	0..1	Previous Temporary Identifier (TIDn-1) ₂	

5.5.2.3 Type AiotDeviceProfileDataPatch

Table 5.5.2.3-1: Definition of type AiotDeviceProfileDataPatch

Attribute name	Data type	P	Cardinality	Description	Applicability
lastKnownAiotfInfo	LastKnownAiotfInfo	M	1	Indicate the last known AIOTF that serves the AIoT device, or unknown.	
tidCurrent	Tid	O	0..1	Current Temporary Identifier (TIDn).	
tidPrevious	Tid	O	0..1	Previous Temporary Identifier (TIDn-1) ₂	

5.5.3 Simple data types and enumerations

5.5.3.1 Introduction

This clause defines simple data types and enumerations that can be referenced from data structures defined in the previous clauses.

5.6 Error handling

Table 5.6-1 lists common response body data structures used within the nudr-dr (Nudr_DataRepository) API.

Table 5.6-1: Common Response Body Data Structures

Data type	P	Cardinality	Response codes	Description
ProblemDetails	O	0..1	4xx, 5xx responses	For unsuccessful status codes, the UDR may provide detailed information.

NOTE: In addition common data structures as defined in 3GPP TS 29.500 [4] are supported.

The application error handling shall follow 3GPP TS 29.504 [15] clause 6.1.6 unless explicitly specified in this document.

5.7 Feature negotiation

The optional features in table 6.1.8-1 of 3GPP TS 29.504 [15] are defined for the Nudr_DataRepository API. They shall be negotiated using the extensibility mechanism defined in clause 6.6 of 3GPP TS 29.500 [4].

Annex A (normative): OpenAPI specification

A.1 General

This Annex specifies the formal definition of the API(s) defined in the present specification. It consists of OpenAPI specifications in YAML format.

This Annex takes precedence when being discrepant to other parts of the specification with respect to the encoding of information elements and methods within the API(s).

NOTE 1: The semantics and procedures, as well as conditions, e.g. for the applicability and allowed combinations of attributes or values, not expressed in the OpenAPI definitions but defined in other parts of the specification also apply.

Informative copies of the OpenAPI specification files contained in this 3GPP Technical Specification are available on a Git-based repository that uses the GitLab software version control system (see clause 5.3.1 of 3GPP TS 29.501 [5] and clause 5B of 3GPP TR 21.900 [7]).

A.2 Nudr_DataRepository API for AIoT data API

For the purpose of referencing entities in the Open API file defined in this Annex, it shall be assumed that this Open API file is contained in a physical file named "TS29506_Aiot_Device_Profile_Data.yaml".
